

Naveen S S

Coimbatore, Tamil Nadu | Ph: +91 8124829521 | ssnaveen2225@gmail.com | [linkedin.com/Naveen S S](https://www.linkedin.com/in/Naveen S S)

CAREER OBJECTIVE

Embedded Systems Engineer with hands-on experience in microcontrollers, PCB design, and IoT protocols, aiming to contribute to real-time embedded systems and smart product development.

EDUCATIONAL QUALIFICATION

SNS COLLEGE OF TECHNOLOGY Coimbatore, Tamil Nadu
B.E Electronics and Communication Engineering with a Minor in AI & DS CGPA : 8.72

CMS MATRICULATION HIGHER SECONDARY SCHOOL Coimbatore, Tamil Nadu
HSC Computer Science and Mathematics Grade : 84.3%

WORK EXPERIENCE

Enthu Technologies Pvt Ltd Coimbatore, Tamil Nadu
PCB Design Intern June 2026

- Designed PCB schematics and single & double-layer layouts using KiCad
- Performed footprint selection, PCB routing, and Design Rule Check (DRC) validation
- Generated Gerber (CAM) files, BOM, and manufacturing outputs following industry-standard PCB design practices

Edu Net Foundation Coimbatore, Tamil Nadu
Employability Skills & Digital Literacy with AI Intern Nov 2025 – Dec 2025

- Developed communication, teamwork, problem-solving, and professional skills through structured employability and digital literacy training
- Gained practical proficiency in MS Office, digital tools, online collaboration platforms, and cybersecurity fundamentals
- Acquired foundational knowledge of Artificial Intelligence and its real-world applications, strengthening analytical thinking and decision-making through practical activities

Edu Net Foundation Coimbatore, Tamil Nadu
Shell Green Skills (Sustainability) Intern Oct 2025 – Nov 2025

- Gained hands-on experience in the AI/ML model development lifecycle, including data preprocessing, visualization, modeling, model selection, evaluation, and optimization
- Applied AI techniques to sustainability and Green Skills challenges, developing solutions and project prototypes for real-world applications
- Strengthened project management and independent problem-solving skills by working under mentorship, meeting weekly milestones, and delivering projects within deadlines

Edu Net Foundation Coimbatore, Tamil Nadu
Artificial Intelligence & Cloud Technology Intern Sept 2025 – Oct 2025

- Completed a 4-week internship in Artificial Intelligence and Cloud Technology through Edu Net Foundation in collaboration with IBM SkillsBuild
- Gained foundational knowledge of AI concepts, cloud computing, data storage, and cloud-based applications through structured technical training
- Strengthened technical and professional skills through hands-on learning and active participation in an AICTE-recognized technical program

Bharat Sanchar Nigam Limited (BSNL) Coimbatore, Tamil Nadu
Telecommunication Intern June 2025

- Studied telephone exchange operations, fibre-optic networks, and mobile tower infrastructure for voice/data transmission
- Explored broadband and mobile service delivery (2G/3G/4G) and IP addressing fundamentals
- Worked with telecom equipment configuration, including routers and switches

Akira Controls

Product Realization Intern

Coimbatore, Tamil Nadu

July 2024 – Aug 2024

- Integrated sensors and communication protocols for IoT-based automation and control systems
- Designed PCBs and worked with embedded microcontrollers for real-time control applications
- Supported product realization workflows bridging hardware design and IoT integration

PROJECTS

CommHand

Oct 2025

- Designed a prototype using sensors and a microcontroller to detect hand movements and translate them into text and audible speech.
- Bridges the communication gap for individuals with speech disabilities by converting physical gestures into vocal output.

Fake News Detector Using AI

Oct 2025

- Developed a machine learning model to combat misinformation by analyzing text and classifying news as "REAL" or "FAKE" in real-time.
- Built a user-friendly Streamlit web application to allow users to input headlines and receive instant authenticity predictions.

Automated Valves to Regulate Water Flow

Dec 2024

- Designed to achieve optimal crop yield
- Used to Avoid Manual Control in Piped and Micro irrigation systems cannot adapt to changing soil moisture levels

AI Enhanced Solar Tracking for Optimal Panel Alignment

Feb 2024

- AI powered system that dynamically adjusts the orientation of solar panels using real time sensor data
- A Hybrid Solar Tracking Mechanism that combines intelligent algorithm with energy efficient mechanical components

ACTIVITIES

Campus Ambassador for BECON'26

Coimbatore, Tamil Nadu

Event Coordinator

Dec 2025 – Feb 2026

- Selected as a Campus Ambassador for BECON '26, the annual Business and Entrepreneurship Conclave organized by the Entrepreneurship Development Cell, IIT Delhi
- Recognized for dedication and significant contribution as a Campus Ambassador during the BECON '26 tenure from December 2025 to February 2026.

Executive Member of ECE Department ELCONATOR'24

Coimbatore, Tamil Nadu

Event Coordinator

Sep 2024 – May 2025

- Spearheaded the modernization of labs
- Initiated and executed setup of a project lab to support final year and mini projects

ADDITIONAL

- **Technical Skills:** Intermediate in Python & C++, PCB Designing (KiCad, Copper Cam), Microcontroller (Arduino & ESP 32)
- **Languages:** Fluent in English, Native in Tamil, Beginner in Hindi
- **Certifications & Training:** Embedded for Beginners(NIELIT), VLSI for Beginners (NIELIT), Introduction to Industry 4.0 and Internet of Things (NPTEL), Cloud Computing (NPTEL), Artificial Intelligence Fundamentals (IBM), Azure AI Fundamentals(Microsoft), Machine Learning Foundations (AWS), Web Design and Development (Skill India), Generative AI Foundations (Oracle), System Administration RH124 – RHA (Redhat)
- **Awards:** All Round Performer Nominee 2024-2025
